- This tool may not fit all pill bottles. It is designed to fit standard cylindrical bottles dispensed at most pharmacies.
- To use: remove liner from 3M™ repositionable adhesive.
- Stick to medicine bottle. Do not cover important information.
- Align all indicators to the left.
- Slide and click indicator to the right after taking medication each day.
- At week end simply slide and click all indicators to the left again.
- After all medication is taken, remove and stick to new medicine bottle.
